

Sustainable Hadstock Project

Data Protection Statement

This summer we shall be collecting information about each house and household in Hadstock as part of the *Sustainable Hadstock* project.

1. What information/data is being collected?

In order to have a clear picture of the current situation in Hadstock, regarding heating and energy consumption, biodiversity and the reusing and recycling of waste, a survey will be sent to all households to complete.

2. Why is this information/data being collected?

The information/data is being collected to analyse the current situation and support residents individually, as well as the whole village, to create a more sustainable, low carbon future.

The contact details are being collected so that anyone who requests any of the free services that may be offered e.g heat camera or domestic energy survey, can receive support and advice. Residents, who would like further information should contact sustainablehadstock@gmail.com

3. Where will this information/data be stored?

The information/data that is collected will not be shared with any other person or group. It will only be used in an anonymised manner. Personal contact details will be kept separately from the rest of the questionnaire. All information/data will be kept securely within Hadstock. A Data Protection Officer has been appointed to ensure the security of the data.

4. For how long will the information/data be stored?

The information/data that is collected will be stored for the length of the project only.
